

UPA Armoured Doors produces and sells its doors to more than 70 countries around the world, also offers fire rated doors for hotels projects and any other project that you might have. All fire rated doors are certified having durability 30, 60, 90, 120 minutes. Our fire rated doors offer you 100% security and aesthetic appearance.

WOODEN FIRE DOORS 30 MINUTES

CERTIFIED

DURABLE

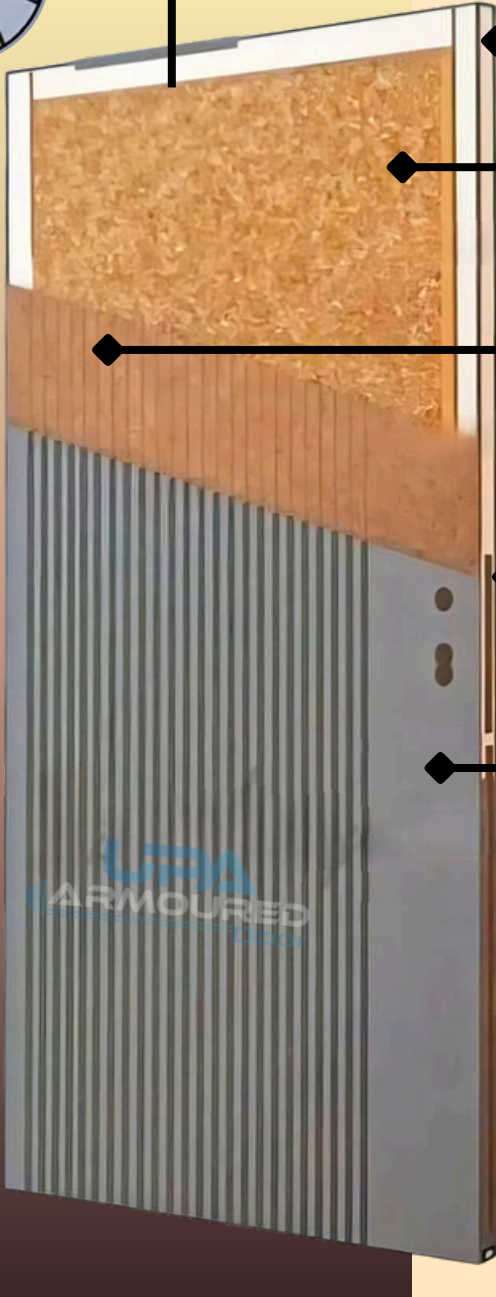

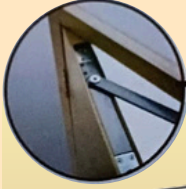

FIRE RESISTANT

SOUND ISOLATION

HEAT ISOLATION

DOOR RAIL

Humidity level 10-14%. First-class, non-wrapping, kiln-dried, finger-jointed fir spar.

DOOR INNER FILLING

33mm, tubular chipboard, resistant to structural processing. Provides heat and sound isolation and is non-flammable.

SURFACE

MDF surfaces will be used on PVC, lacquered, and laminate doors as desired.

LOCK GAP

Specially manufactured fire-resistant doors with locking holes of appropriate size for handles. These compartments and hinge holes are supported by concealed protective pads.

SURFACE COATING

PVC, laquer & laminate doors will be coated with a surface coating suitable for the model and request.

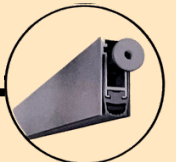

EDGE BAND

Moisture and water resistant 0.80 micron band.

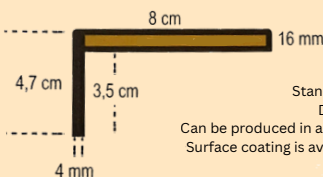

SUPPORT EQUIPMENT

Brushed smoke wicks integrated into the door leaf that prevent cold and hot smoke.

Metal concealed guillotine for closing the gap between the door and the threshold, fire and smoke sealing, acoustic isolation and lightproofing.

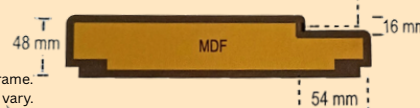

ARCHITRAVE

Standard MDF architrave. Dimensions may vary. Can be produced in any width & thickness. Surface coating is available depending on the door type.

FRAME

Standard MDF Frame. Dimensions may vary. Production to desired width is possible. Surface coating process will be applied, depending on the door type. Hinge countersunk slots will be drilled and 45-degree cuts will be made.

COEX DOOR SEAL

120 KG CARRYING CAPACITY
CERTIFIED STEEL HINGE
